

NAME: KAVINMITHA.S

REG NO: 1925211285

COURSE: CSA1402 COMPILER DESIGN

1.

The screenshot shows the Programiz C Online Compiler interface. The code in `main.c` is as follows:

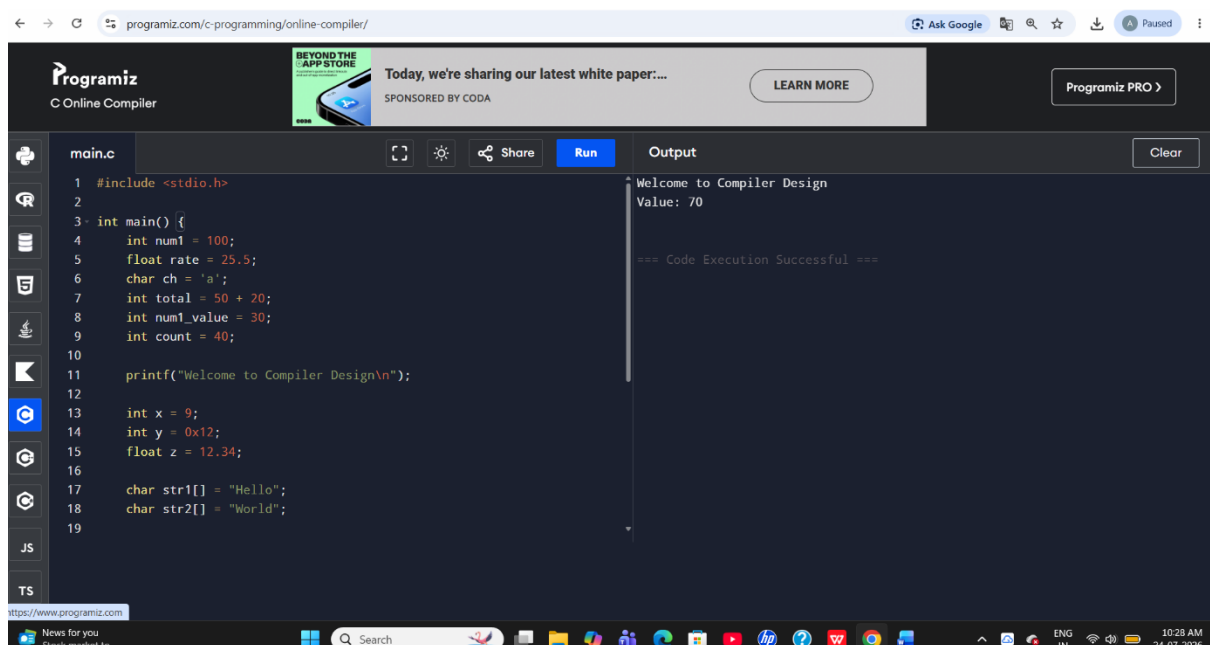

```
1 #include <stdio.h>
2
3 int sumArray(int arr[], int n) {
4     int i, sum = 0;
5
6     for(i = 0; i < n; i++) {
7         sum = sum + arr[i];
8     }
9
10    return sum;
11 }
12
13 int main() {
14     int arr[5] = {1, 2, 3, 4, 5};
15     int total;
16
17     total = sumArray(arr, 5);
18
19     if(total == 15) {
```

The output window displays the following text:

```
Correct Sum
Division Result = 5
Pointer Value = 20

=== Code Execution Successful ===
```

2.

The screenshot shows the Programiz C Online Compiler interface. The code in `main.c` is as follows:

```
1 #include <stdio.h>
2
3 int main() {
4     int num1 = 100;
5     float rate = 25.5;
6     char ch = 'a';
7     int total = 50 + 20;
8     int num1_value = 30;
9     int count = 40;
10
11    printf("Welcome to Compiler Design\n");
12
13    int x = 9;
14    int y = 0x12;
15    float z = 12.34;
16
17    char str1[] = "Hello";
18    char str2[] = "World";
19
```

The output window displays the following text:

```
Welcome to Compiler Design
Value: 70

=== Code Execution Successful ===
```

3.

The screenshot displays the Programiz C Online Compiler interface. The browser address bar shows the URL `programiz.com/c-programming/online-compiler/`. The page header includes the Programiz logo, a navigation menu, and a banner for Christopher Felix Debatin. The main workspace is divided into two panels: a code editor on the left and an output console on the right.

Code Editor: The file is named `main.c`. The code is as follows:

```
1 #include <stdio.h>
2
3 int divide(int a, int b) {
4     return a / b;
5 }
6
7 int main() {
8     int value = 20;
9     float num = 15.5;
10    int result;
11
12    result = divide(10, 2);
13
14    if(result == 5) {
15        printf("Result is 5\n");
16    }
17
18    int x = 10;
19    int v = 2;
```

Output Console: The output shows the result of the program execution:

```
Result is 5
4
Pointer Value = 25
10
11
12
13
14
15
16
17
18
19

=== Code Execution Successful ===
```

The bottom of the image shows a Windows taskbar with various application icons, a search bar, and the system clock indicating 10:29 AM on 24-07-2026.
